

Wireframe for project 1

(Booking form)

This booking form is able to collect some basic information and other needs for users in four main steps.

Users can fill out this form for their lodge reservations. The form is able to switch between different steps by clicking the next and previous buttons, and the information could be presenting on a new page before submitting.

There is also a progress bar at the top of the form so that users know where they are.

Some HTML5 inputs are used in this form, including Date-picker, Radio buttons, Checkbox, Number box, Text box, Email, Tel, Color-picker and Textarea.

JavaScript is used to transfer data in the form.
